

# ROBO Cylinder® Configurations Cartesian Robot K Series

## Cartesian Robots have never been more affordable.

The ROBO Cylinder® equipped as standard with a Battery-less Absolute Encoder has been added to the "IK Series". It helps reduce the design and assembly steps.

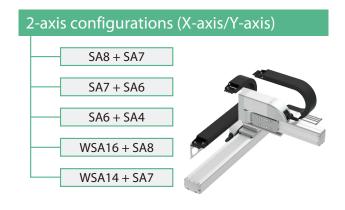

The ROBO Cylinder® RCP6 Series has been adopted to achieve even higher speeds compared with conventional models.

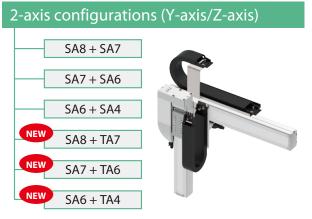

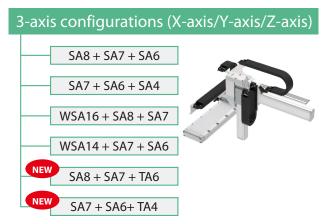

# **Diverse Configurations**

The available configurations have been greatly expanded from the conventional models, allowing the ideal selection to suit your needs from 516 options.

New configurations include a table type (TA) with the Z-axis and a model with ZR unit (vertical/rotation).

# Equipped with high resolution Battery-less Absolute Encoder as standard.

Equipped as standard with Battery-less Absolute Encoder for all configuration axes. No battery maintenance is required since there is no battery.

Homing operation is not required at startup or after emergency stop or malfunction. This reduces your operation time, resulting in reduced production costs.

## The advantages of using an absolute encoder.

- (1) With an absolute encoder, home return is not required.
- (2) No external home sensor is required since home return is not necessary.
- (3) Removal of workpieces is not necessary, even after an emergency stop.
- (4) The troublesome creation of home-return programs is not necessary even when stopping inside of a complex machine.

## The advantages of battery-less.

- (1) No battery maintenance required.
- (2) No installation space for battery required.

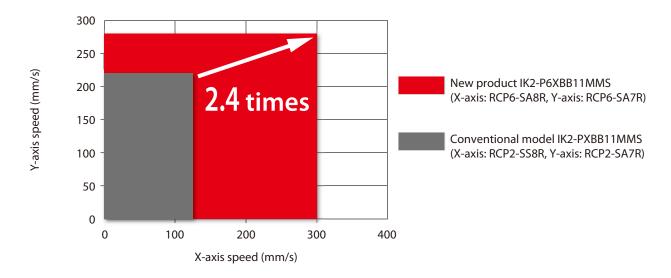

# **Higher Speed**

Compatible with PowerCON® which is equipped with a high-output driver.

The maximum speed has been increased with the use of PowerCON®.

This can reduce cycle time and help improve productivity.

# Robot Type Descriptions

Each configuration pattern is available with an extensive range of sizes from light load to heavy load and short stroke to long stroke. Select the optimal model for your application.

## XYB (Y-axis base mount) type

A basic configuration type in which the base of the Y-axis is fixed to the X-axis slider. It is operated by fixing equipment or a Z-axis on the Y-axis slider.

Select from 4 patterns of Y-axis configuration directions. (See the figure at right)

## Point 2

A cable track can be selected for Y-axis wiring. Select the cable track size from a maximum of 4 different sizes. You can also select a cable track for wiring by the user.

## → 2-axis configurations IK2-P6XB:

# **Configuration Direction**

## YZB (Z-axis base mount) type

For this type, the base of the Z-axis (vertical axis) is fixed to the Y-axis slider with the Y-axis side-mounted. The Z-axis slider moves vertically, allowing mounting of jigs or chucks for transport, raising, or lowering of workpieces.

Select from 2 patterns of Z-axis configuration directions. (See the figure at right)

A cable track can be selected for Z-axis wiring. Select the cable track size from a maximum of 4 different sizes. You can also select a cable track for wiring by

## • 2-axis configurations IK2-P6YB:

**Configuration Direction** 

## XYB (Y-axis base mount) + Z-axis base mount type

For this type, the base surface of the Z-axis is fixed to the Y-axis slider of XYB type (Y-axis base is fixed to X-axis slider).

## Point 1

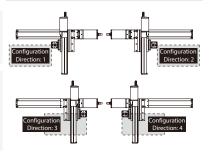

The Z-axis body is fixed and the slider moves vertically.

## Point 2

Cable tracks can be selected for Y-axis and Z-axis wiring. Select the cable track size from a maximum of 4 different sizes. You can also select a cable track for wiring by the user.

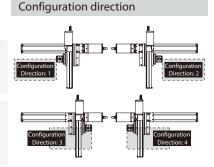

## → 3-axis configurations IK3-P6BB: p71~118

## **Configuration Direction**

4-axis configurations IK4-P6BB:

XYB (Y-axis base mount) + ZR (vertical/rotation) unit type

This is an XYB (Y-axis base mount) type Y-axis slider equipped with a ZR unit that enables both vertical and rotational operation.

More compact with the integrated Z-axis and rotational axis.

Cable tracks can be selected for Y-axis and Z-axis wiring. Select the cable track size from a maximum of 4 different sizes.

## Applicable Controllers

Controllers are sold separately. Please refer to each controller page.

## ☐ X-axis: SA8C

Туре	Reference page
PCON-CFB/CGFB	See P.149
MSEL-PCF/PGF	See P.139

#### ☐ Y-axis: SA7C

Туре	Reference page
PCON-CB/CGB	See P.149
PCON-CYB/PLB/POB	Please contact IAI for more information.
MCON-C/CG	See P153
MCON-LC/LCG	See P. 153
MSEL	See P.139

<sup>\*</sup> Operation is possible with the high output setting specification. When connecting to the MCON controller, "HIGH OUTPUT SETTING SPECIFICATION" must be selected. Please contact IAI regarding use with the high-output setting disabled.

## Cable Length

Type	Cable code	Length
	1L	1m
Charadaud hura	3L	3m
Standard type	5L	5m
	ΠL	Specified length (15m max )

Note 1. All-axis standard cable is used.

Note 2. The length of the second axis cable is from the exit of the cable track. A separate robot cable is included for wiring inside the cable track.

Note 3. The standard lengths are 1m, 3m and 5m, but other lengths can be specified in 1m increments up to 15m.

Туре	Model	Reference page	First wiring (X-axis lateral)	Second wiring (Y-axis lateral)

Note 1. All-axis standard cable is used.

Note 2. The length of the second axis cable is from the exit of the cable track.

A separate robot cable is included for wiring inside the cable track.

Note 3. The standard lengths are 1m, 3m and 5m, but other lengths can be specified in 1m increments up to 15m.

## (\*) Notes

The Y-axis cable track guide rail is to be fixed to the Y-axis mounting surface by the customer. Please note that there will be an overhang outside the Y-axis mounting surface. Also, the moving end of the Z-axis cable track is to be fixed to a plate or the like mounted on the Z-axis slider by the customer.

\* Be sure to specify.
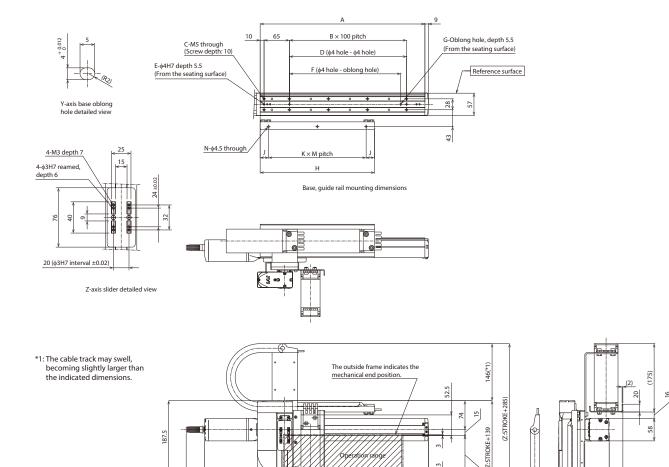

\* Brake option for Y-axis increases the length of the motor unit.

Please contact IAI for more information.

- Note 1. The configuration position in the figure is home.
- Note 2. The diagram shows the configuration direction "1" where both the first wiring and second wiring have cable tracks.
- Note 3. For details on the cable track and cable track moving end bracket, refer to P.136.

## (\*) Notes

The Y-axis cable track guide rail is to be fixed to the Y-axis mounting surface by the customer. Please note that there will be an overhang outside the Y-axis mounting surface. Also, the moving end of the Z-axis cable track is to be fixed to a plate or the like mounted on the Z-axis table by the customer.

#### Applicable Controllers

Controllers are sold separately. Please refer to each controller page.

### ☐ Y-axis: SA7C, Z-axis: TA6C

Type	Reference page
PCON-CB/CGB	See P.149
PCON-CYB/PLB/POB	Please contact IAI for more information.
MCON-C/CG	See P.153
MCON-LC/LCG	3ee r.133
MSEL	See P.139

2.5

\* Operation is possible with the high output setting specification. When connecting to the MCON controller, "HIGH OUTPUT SETTING SPECIFICATION" must be selected.
Please contact IAI regarding use with the high-output setting disabled.

#### Cable Length

Type	Cable code	Length
	1L	1m
G. 1 1.	3L	3m
Standard type	5L	5m
	□L	Specified length (15m max.)

Note 1. All-axis standard cable is used.

Note 2. The length of the second axis cable is from the exit of the cable track. A separate robot cable is included for wiring inside the cable track.

Note 3. The standard lengths are 1m, 3m and 5m, but other lengths can be specified in 1m increments up to 15m.

Туре	Model	Reference page	First wiring (Y-axis side)	Second wiring (Z-axis side)
Without cable track (cable only)	N		_	-
Cable track S size (inner width: 38mm)	CT		0	0
Cable track M size (inner width: 50mm)	CTM	See	0	0
Cable track L size (inner width: 63mm)	CTL	P.136	0	0
Cable track XL size (inner width: 80mm) *	CTXL		0	Cannot be selected *

\* Only the first wiring can be selected

#### Specifications

Item		Y-axis	Z-axis			
Axis configuration		RCP6-SA7C	RCP6-TA6C			
Stroke		50 ~ 800mm (Every 50mm)	50 ~ 200mm (Every 25mm)			
Max speed *	SM	640mm/s	280mm/s			
Max speed "	SH	04011111/5	440mm/s			
Motor size		56□ Stepper motor	42□ Stepper motor			
Ball screw	SM	24mm	6mm			
lead	SH	2411111	12mm			
Drive system		Ball screw \( \phi 12mm \) rolled C10	Ball screw \$10mm rolled C10			
Positioning repea	atability	±0.01mm				
Base material		Aluminum				
Ambient operating temperature, humidity		0~40°C, 85% RH or less (non-condensing)				

<sup>\*</sup> The maximum speed may not be reached if the travel distance is short or acceleration is low.

Maximum speed may change depending on the stroke. For details, refer to the Maximum Speed by Stroke table on P.137.

Cable Track

<sup>\*</sup> Outside as standard. Be sure to specify.

 $<sup>\</sup>mbox{\ensuremath{^{\ast}}}$  Brake option for X- and/or Y-axes increases the length of the motor unit(s). Please contact IAI for more information.

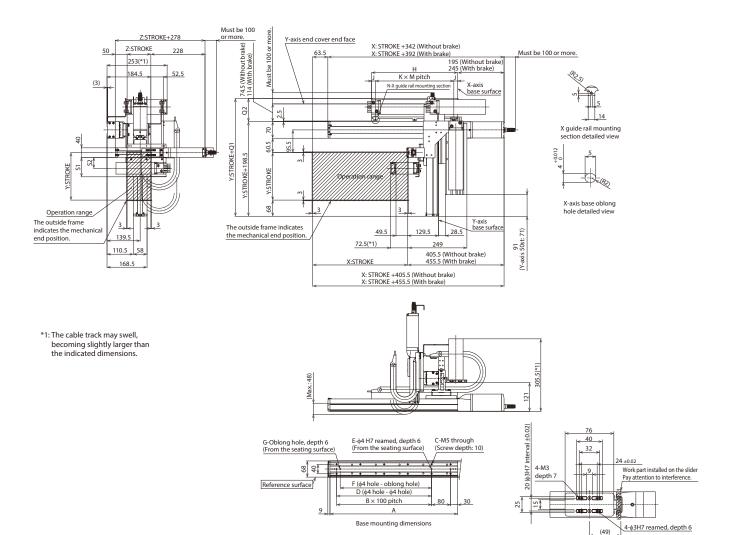

Options (2)		
Туре	Option code	Reference page
Foot plate	FTP	See P.134

<sup>\*1</sup> When the speed type "HHL" is selected, the maximum Y-axis stroke will be 200 mm.

<sup>\*2</sup> The maximum speed may not be reached if the travel distance is short or acceleration is low. Maximum speed may change depending on the stroke. For details, refer to the Maximum Speed by Stroke table on P.137.

- 3D CAD
- Note 1. The configuration position in the figure is home.
- Note 2. The diagram shows first, second and third wirings all with cable tracks.
- Note 3. For details on the cable track and cable track moving end bracket, refer to P.136.

(\*) Notes

The X-axis cable track guide rail is to be fixed to the surface on which the X-axis is installed by the customer. When the foot plate option is selected, the unit will be shipped fixed on the foot plate. (See P.134)

Also, the moving end of the Z-axis cable track is to be fixed to a plate or the like mounted on the Z-axis slider by the customer.

Slider section roller specification	SR	See P.135	-	-	-	

<sup>\*</sup> Be sure to specify.

<sup>\*</sup> Brake option for X-axis increases the length of the motor unit. Please contact IAI for more information.

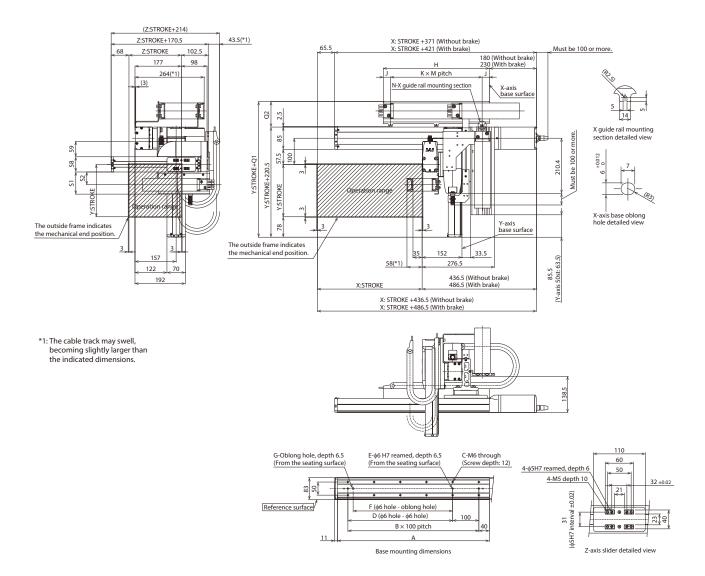

Options (2)		
Туре	Option code	Reference page
Foot plate	FTP	See P.134

<sup>\*2</sup> Only the first wiring can be selected

<sup>\*2</sup> The maximum speed may not be reached if the travel distance is short or acceleration is low. Maximum speed may change depending on the stroke. For details, refer to the Maximum Speed by Stroke table on P.137.

- 3D CAD
- Note 1. The configuration position in the figure is home.
- Note 2. The diagram shows first, second and third wirings all with cable tracks.
- Note 3. For details on the cable track and cable track moving end bracket, refer to P.136.

(\*) Notes

The X-axis cable track guide rail is to be fixed to the surface on which the X-axis is installed by the customer. When the foot plate option is selected, the unit will be shipped fixed on the foot plate. (See P.134) Also, the moving end of the Z-axis cable track is to be fixed to a plate or the like mounted on the Z-axis slider by the customer.

Cable exit direction (Left)	CJL	See P.134	0	sele	cted
Cable exit direction (Bottom)	CJB	See P.134	0		
Non-motor end specification	NM	See P.135	0	0	0
Slider section roller specification	SR	See P.135	0	0	0

<sup>\*</sup> Outside as standard. Be sure to specify.

<sup>\*</sup> Brake option for X- and/or Y-axes increases the length of the motor unit(s). Please contact IAI for more information.

Options (2)		
Type	Option code	Reference page
Foot plate	FTP	See P.134

<sup>\*2</sup> Only the first wiring can be selected

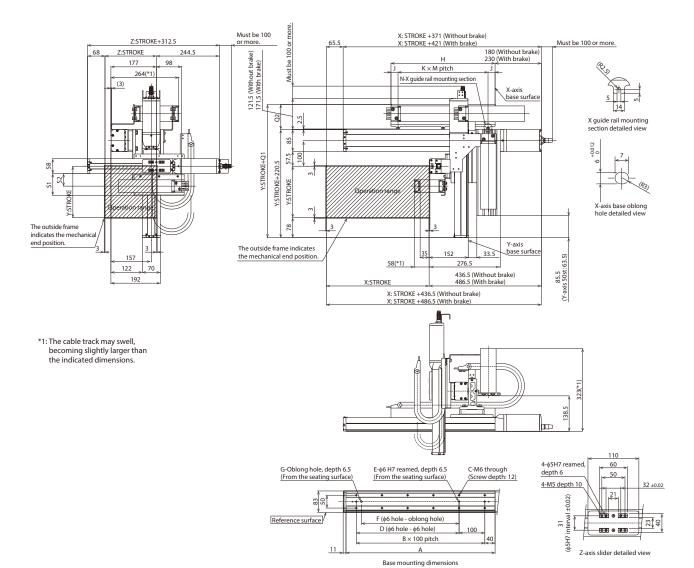

<sup>\*1</sup> When the speed type "HSL" is selected, the maximum Y-axis stroke will be 250mm.

<sup>\*2</sup> The maximum speed may not be reached if the travel distance is short or acceleration is low. Maximum speed may change depending on the stroke. For details, refer to the Maximum Speed by Stroke table on P.137.

- Note 1. The configuration position in the figure is home.
- Note 2. The diagram shows first, second and third wirings all with cable tracks.
- Note 3. For details on the cable track and cable track moving end bracket, refer to P.136.

(\*) Notes

The X-axis cable track guide rail is to be fixed to the surface on which the X-axis is installed by the customer. When the foot plate option is selected, the unit will be shipped fixed on the foot plate. (See P.134) Also, the moving end of the Z-axis cable track is to be fixed to a plate or the like mounted on the Z-axis slider by the customer.

### Cable Length

Type	Cable code	Length
	1L	1m
Standard	3L	3m
type	5L	5m
	□L	Specified length (15m max.)

Note 1. All-axis standard cable is used.

Note 2. The length of the second and third axis cable is from the exit of the cable track. A separate robot cable is included for wiring inside the cable track.

Note 3. The standard lengths are 1 m, 3m and 5m, but other lengths can be specified in 1m increments up to 15m.

Туре	Model	Reference page	First wiring (X-axis lateral)	Second wiring (Y-axis lateral)	Third wiring (Z-axis lateral)
Without cable track (cable only)	N		0	0	0
Cable track S size (inner width: 38mm)	СТ		0	0	0
Cable track M size (inner width: 50mm)	CTM	See P.136	0	0	0
Cable track L size (inner width: 63mm)	CTL		0	0	Cannot be selected *1
Cable track XL size (inner width: 80mm)	CTXL		0	Cannot be	selected *2

\*1 Only the first and second wiring can be selected 
\*2 Only the first wiring can be selected

### Applicable Controllers

Controllers are sold separately. Please refer to each controller page.

### ☐ X-axis: WSA14C, Y-axis: SA7C, Z-axis: SA6C

Туре	Reference page
PCON-CB/CGB	See P.149
PCON-CYB/PLB/POB	Please contact IAI for more information.
MCON-C/CG	See P.153

# Cable Length

Type	Cable code	Length
	1L	1m
Standard	3L	3m
type	5L	5m
	ΠL	Specified length (15m max )

Note 1. All-axis standard cable is used.

Note 2. The length of the second and third axis cable is from the exit of the cable track. A separate robot cable is included for wiring inside the cable track.

Note 3. The standard lengths are 1m, 3m and 5m, but other lengths can be specified in 1m increments up to 15m.

# Cable Track

Туре	Model	Reference page	First wiring (X-axis lateral)	Second wiring (Y-axis lateral)	Third wiring (Z-axis lateral)
Without cable track (cable only)	N		0	0	0
Cable track S size (inner width: 38mm)	CT		0	0	0
Cable track M size (inner width: 50mm)	CTM	See P.136	0	0	0
Cable track L size (inner width: 63mm)	CTL		0	0	Cannot be selected *1
Cable track XL size (inner width: 80mm)	CTXL		0	Cannot be	selected *2

<sup>\*1</sup> Only the first and second wiring can be selected 
\*2 Only the first wiring can be selected

# Applicable Controllers

Controllers are sold separately. Please refer to each controller page.

# ☐ X-axis: WSA16R, Y-axis: SA8R

Туре	Reference page
PCON-CFB/CGFB	See P.149
MSEL-PCF/PGF	See P.139

# $\square$ Z-axis: SA7R

Type	Reference page
PCON-CB/CGB	See P.149
PCON-CYB/PLB/POB	Please contact IAI for more information.
MCON-C/CG	See P.153
MCON-LC/LCG	See P.153
MSFI	See P139

<sup>\*</sup> Operation is possible with the high output setting specification.

When connecting to the MCON controller, "HIGH OUTPUT SETTING SPECIFICATION" must be selected. Please contact IAI regarding use with the highoutput setting disabled.

Options					
Туре	Option code	Reference page	X-axis	Y-axis	Z-axis
Brake	В	See P.134	-	-	Standard equipment *
Cable exit direction (Outside)	CIO	See P.134	Cann sele		Standard equipment *
Non-motor end specification	NM	See P.135	-	-	-
Slider section roller specification	SR	See P.135	-	-	-

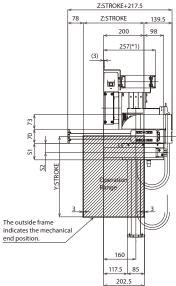

<sup>\*</sup> Be sure to specify.

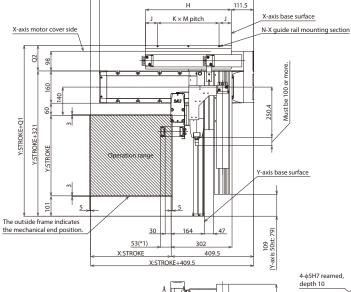

- Note 1. The configuration position in the figure is home.
  - Note 2. The diagram shows first, second and third wirings all with cable tracks.

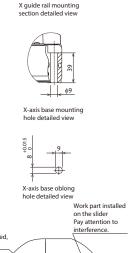

X:STROKE+365.5

Note 3. For details on the cable track and cable track moving end bracket, refer to P.136.

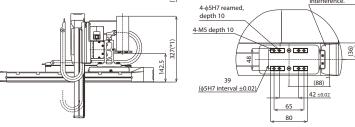

\*1: The cable track may swell. becoming slightly larger than the indicated dimensions.

# (\*) Notes

The X-axis cable track guide rail is to be fixed to the surface on which the X-axis is installed by the customer.

Also, the moving end of the Z-axis cable track is to be fixed to a plate or the like mounted on the Z-axis slider by the customer.

# Cable Length

Type	Cable code	Length
	1L	1m
Standard	3L	3m
type	5L	5m
	ΠL	Specified length (15m max )

Note 1. All-axis standard cable is used.

Note 2. The length of the second and third axis cable is from the exit of the cable track. A separate robot cable is included for wiring inside the cable track.

Note 3. The standard lengths are 1 m, 3m and 5m, but other lengths can be specified in 1m increments up to 15m.

# Cable Track

Туре	Model	Reference page	First wiring (X-axis lateral)	Second wiring (Y-axis lateral)	Third wiring (Z-axis lateral)

- \* Outside as standard. Be sure to specify.
- $\mbox{\ensuremath{^{\ast}}}$  Brake option for X- and/or Y-axes increases the length of the motor unit(s). Please contact IAI for more information.

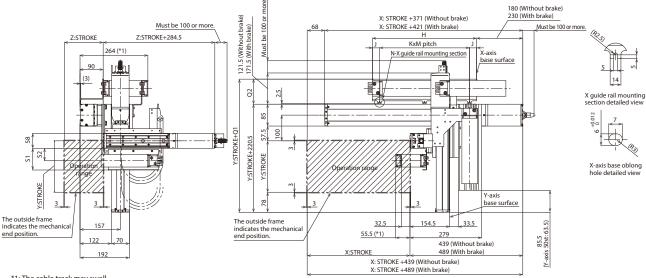

Options (2)		
Туре	Option code	Reference page
Foot plate	FTP	See P.134

<sup>\*</sup> The maximum speed may not be reached if the travel distance is short or acceleration is low. Maximum speed may change depending on the stroke. For details, refer to the Maximum Speed by Stroke table on P.137.

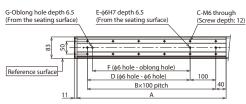

CAD drawings can be downloaded from our website. www.intelligentactuator.com

- Note 1. The configuration position in the figure is home.
- Note 2. The diagram shows first, second and third wirings all with cable tracks.
- Note 3. For details on the cable track and cable track moving end bracket, refer to P.136.

\*1: The cable track may swell, becoming slightly larger than the indicated dimensions.

Base mounting dimensions

## (\*) Notes

The X-axis cable track guide rail is to be fixed to the surface on which the X-axis is installed by the customer. Also, the moving end of the Z-axis cable track is to be fixed to a plate or the like mounted on the Z-axis table by the customer.

## Cable Length

Type	Cable code	Length
	1L	1m
Standard	3L	3m
	5L	5m
type		Specified length
	□ <b>L</b>	(Max. 15m)

- Note 1. All-axis standard cable is used.
- Note 2. The length of the second, third, and fourth axis cable is from the exit of the cable track. A separate robot cable is included for wiring inside the cable track.
- Note 3. The standard lengths are 1m, 3m and 5m, but other lengths can be specified in 1m increments up to 15m.

## Cable Length

Type	Cable code	Length
	1L	1m
Standard	3L	3m
type	5L	5m
	□L	Specified length (15m max.)

Note 1. All-axis standard cable is used.

Note 2. The length of the second, third, and fourth axis cable is from the exit of the cable track. A separate robot cable is included

for wiring inside the cable track.

Note 3. The standard lengths are 1m, 3m and 5m, but other lengths can be specified in 1m increments up to 15m.

Cable Track				
Туре	Model	Reference page	First wiring (X-axis side)	Second wiring (Y-axis side)
Without cable track (cable only)	N		-	-
Cable track S size (inner width: 38mm)	СТ		0	0
Cable track M size (inner width: 50mm)	CTM	See P.136	0	0
Cable track L size (inner width: 63mm)	CTL	See P.130	0	0
Cable track XL size (inner width: 80mm)	CTXL		0	Cannot be selected *1

<sup>\*1</sup> Only the first wiring can be selected

## Applicable Controllers

Controllers are sold separately. Please refer to each controller page.

## ☐ X-axis: WSA14C, Y-axis: SA7C, Z-axis, R-axis

Туре	Reference page
PCON-CB/CGB	See P.149
PCON-CYB/PLB/POB	Please contact IAI for more information.
MCON-C/CG	See P.153
MCON-LC/LCG	3ee F.133
MSEL	See P.139

<sup>\*</sup> Operation is possible with the high output setting specification. When connecting to the MCON controller, "HIGH OUTPUT SETTING SPECIFICATION" must be selected. Please contact IAI regarding use with the high-output setting disabled.

## Specifications

Item	X-axis	Y-axis	Z-axis	R-axis		
Axis configuration	RCP6-WSA14C	RCP6-SA7C	TTPIK-AZR

# Cartesian Robot Options

## **Brake**

Option Code B

**Description** This is a holding mechanism that prevents the slider from falling and damaging any attached fittings when the power or servo is turned off. As the Z-axis is designed to be used vertically, a brake will be equipped as a standard feature. For axes other than the Z-axis, please use the brake option as required.

## Slider Cover (IK4 dedicated)

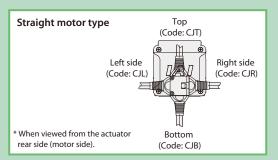

Option Code **CO** 

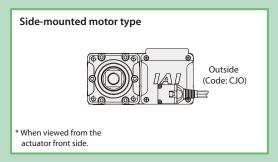

Equips the IK4 (rotational axis specification) with a slider cover for when the Z-axis slider is not in use.

## **Cable Exit Direction**

## Option Code CJT / CJR / CJL / CJB / CJO

Description This option allows you to change the exit direction of the motor-encoder cable to top, bottom, left, or right.

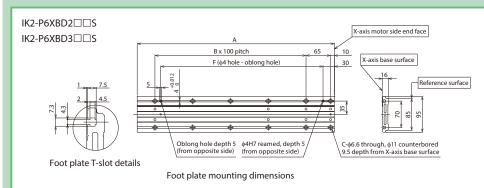

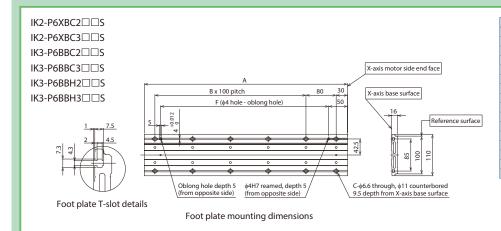

## **Foot Plate**

Option Code FTP

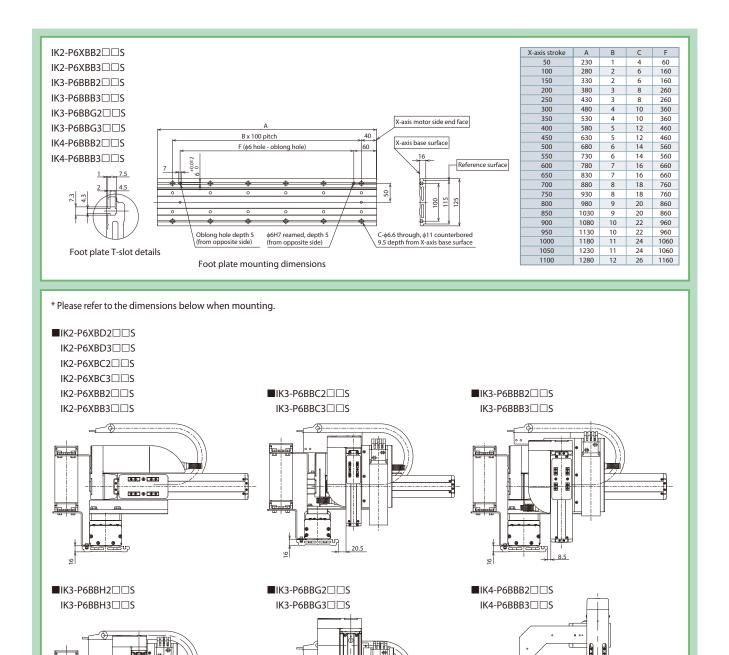

Description X-axis can be installed from the top with this Foot Plate.

X-axis stroke	Α	В	C	F
50	172	0	4	30

750	888	7	18	745
800	938	8	20	845

## **Non-motor End Specification**

Option Code

Description

The normal home position is set by the slider and rod on the motor side, however there is the option for the home position to be on the other side to accommodate variations in equipment layout, etc. (Please note that changing the home position after the actuators are shipped may require the products to be sent back to IAI for re-setting.)

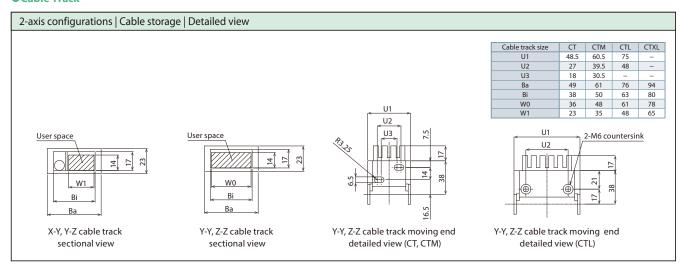

## **Slider Roller Specification**

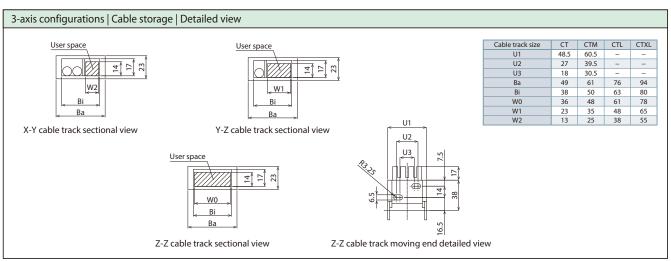

Option Code SR

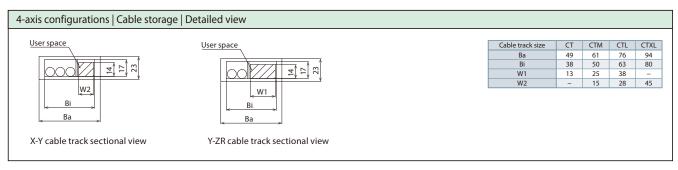

Description The slider of the standard slider type specification is changed to the same roller structure as the cleanroom type. When using the slider roller spec., the appearance and dimensions of the slider cover will be the same as the cleanroom type. Changing to roller specification will make the external view and dimensions of the slider cover the same as the cleanroom type.

# IAI

## Cable Track

Bigger user space is available by ordering as a special specification, if it is insufficient. Please refer to each controller page.

## **Table of Maximum Speed by Stroke**

Only models and axes whose maximum speed varies depending on the stroke are listed.

For models and axes not listed below, there is no change in the maximum speed depending on the stroke. Please refer to the product pages. However, the maximum speed may not be reached if the stroke is short or the acceleration is low.

0.003kg·m² or less	1,000deg/s	

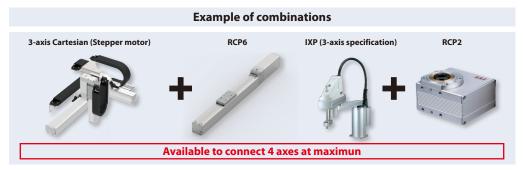

RCP6/RCP5/RCP4/RCP3/RCP2 **Program Controller** 

## **Features**

# Control maximum of 4 axes available with stepper motor mounted ROBO Cylinder

It is also available for interpolation operation, widening the range of possible applications

# Available to connect ROBO Cylinders RCP6/RCP5/RCP4

By applying PowerCON, it is now possible to perform interpolation operation with ROBO Cylinders RCP6/RCP5/RCP4, which are applicable for high-output driver, but were not feasible with the program controller PSEL in the past.

# Reduced wiring/space saving

Until now, with 4 axes controlled for the actuator, 2 controllers (PSEL) for 2-axis control and a 24 V power supply were required. Using MSEL with a built-in power supply, 4-axis control is possible with 1 controller. As a result, wiring is reduced and space is saved.

# In 4-axis controlling of actuator New product MSEL 1 unit Conventional Product PSEL 2 units + PS241 (24 V power supply) Cable Reduction Applicable for 100 ~230VAC with built-in power source

# Equipped with expansion I/O slot

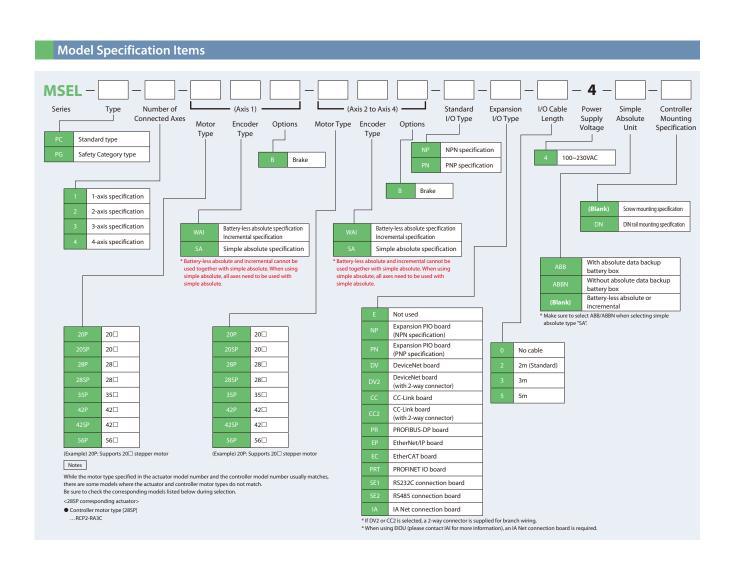

In addition to standard IO (IN 16 points / OUT 16 points), one slot is available as the expansion I/O slot. The expansion I/O is available to select from either a PIO (IN 16 points / OUT 16 points) or one of the various available communication boards.

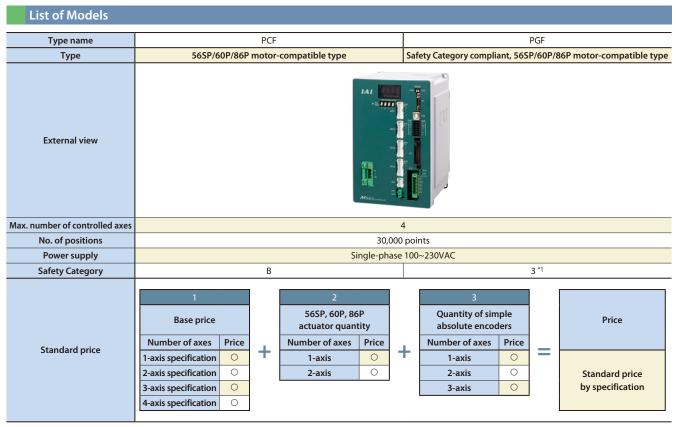

Program controller available for operation of RCP6/RCP5/RCP4/RCP3/RCP2 series actuator. A single unit can handle various forms of control.

Type name		PC	PG
Туре		Standard type	Safety Category type
External view		Accessed in the second	
Max. number of controlled axes		4	4
No. of positions		30,000	points
Power supply		Single-phase	100~230VAC

### Standard I/O (NPN Specification) Internal Circuit

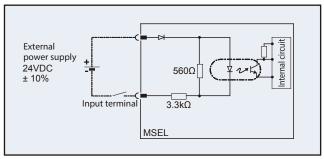

### [Input] External input specification (NPN specification)

ltem	Specification
Input voltage	24VDC ±10%
Input current	7mA, 1 circuit
ON/OFF voltage	ON voltage: min. 16.0VDC; OFF voltage: max. 5.0VDC
Insulation method	Photocoupler insulation

<sup>\*</sup> The port numbers in the circuit diagram below are the default port numbers set at time of shipping.

<sup>\*</sup> The allowable leakage current when input is off is 1mA or less.

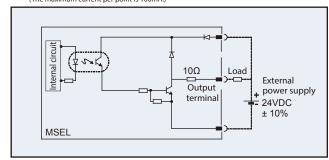

<sup>\*</sup> Please refer to the instruction manual for standard I/O (PNP specification).

### **[Output]** External output specification (NPN specification)

ltem	Specification	
Load voltage	24VDC ±10%	TD62084
Maximum load current	100mA/1 point, 400mA/8 points (Note)	(equivalent) used
Leakage current	0.1mA max./point	(equivalent) used
Insulation method	Photocoupler insulation	

\* The port numbers in the circuit diagram below are the default port numbers set at time of shipping. Note: The total load current is 400mA for every eight points from standard I/O No. 316. (The maximum current per point is 100mA.)

### Expansion I/O (NPN Specification) Internal Circuit

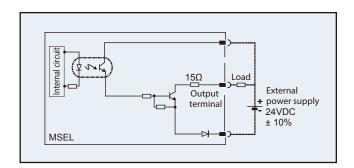

### [Input] External input specification

Item	Specification
Number of input	16 points
Input voltage	24VDC ±10%
Input current	4mA, 1 circuit
ON/OFF voltage	ON voltage: 18VDC min. (3.5mA) OFF voltage: 6VDC max. (1mA)
Insulation method	Photocoupler insulation

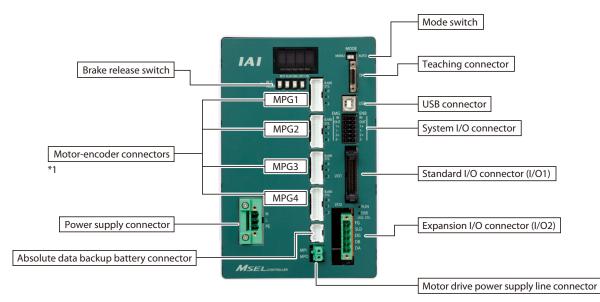

# External power supply 24VDC 5.6kΩ ± 10% Input terminal circuit MSEL

### [Output] External output specification

Item	Specification
Number of output	16 points
Rated load current	24VDC ±10%
Max. current	50mA, 1 circuit
Insulation method	Photocoupler insulation

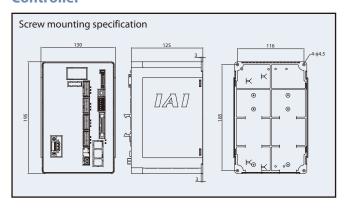

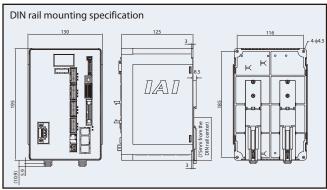

### **Name of Each Component**

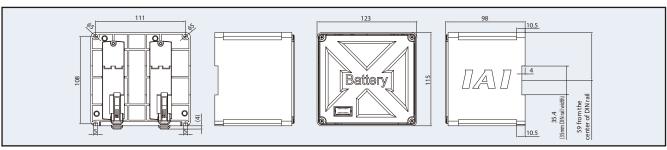

<sup>\*1:</sup> Do not connect a motor to the wrong MPG1, MPG2, MPG3, or MPG4 connector. This may lead to malfunction or failure.

### **Controller**

## Absolute data backup battery box

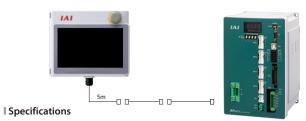

### **Options**

### **Teaching pendant**

**Features** A teaching device equipped with functions such as program and position input, trial operation, monitoring, etc.

Model **TB-02-**□

**Configuration** 

Rated voltage	24V DC
Power consumption	3.6W or less (150mA or less)
Ambient operating temperature	0 to 40°C
Ambient operating humidity	20~85% RH (no condensation)
Environmental resistance	IP20
Mass	470g (TB-02 unit only)

# **Dummy plug**

**Features** Required when operating safety category specification (MSEL-PG/PGF) units or when operated using a USB cable. (MSEL-PG/PGF type, PC software IA-101-X-USBS accessory)

DP-4S Model

### **Connector conversion cable**

**Features** Converts a teaching pendant or RS232C cable D-sub 25-pin connector to an MSEL teaching connector. (TB-01-SJ, TB-02-S, IA-101-X-MW-JS accessory)

Model CB-SEL-SJS002

### **Absolute data backup battery box**

If the simple absolute type is selected with the code ABB, the absolute data backup battery box is included with the controller. However, if the battery box is ordered as a separate unit, batteries will not be included, only the box itself. If the battery is needed, please purchase it separately

(Model: AB-7).

Model MSEL-ABB (battery sold separately)

| External Dimensions See P. 145

\* Cable that connects the absolute data backup battery box and MSEL (Model: CB-MSEL-AB005) is included with the box.

**Replacement battery** 

backup battery box.

Model AB-7

<sup>\*</sup> The number of required absolute batteries is the same as the number of axes.

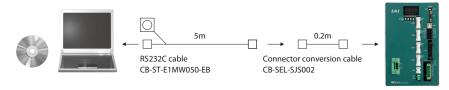

# **PC compatible software (Windows only)**

Features This is start-up support software which comes equipped with functions such as program/position input, trial operation, monitoring, etc. The functions required for debugging have been significantly improved to shorten the start-up time.

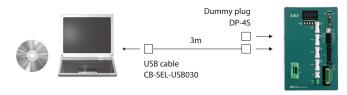

#### **IA-101-X-MW-JS** (With RS232C cable + connector conversion cable) Model

### **| Configuration**

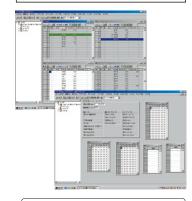

#### **■ Model** IA-101-X-USBS (With USB cable + dummy plug)

### **| Configuration**

Compatible with Windows XP SP2 or later/Vista/7/8

MSEL-PC/PG is supported by Ver.12.00.01.00 or later.

CB-ST-E1MW050-EB cannot be used "when building an enable system using the system I/O connector and an external power supply." or "when building a redundant safety circuit". (The use of CB-ST-A2MW050-EB is required.)

# **Maintenance Parts**

When placing an order for a replacement cable, please use the model name shown below. (\* For connectable actuators, please contact IAI for more information.)

# PCON-CB/CFB

Position Controller for RCP6/RCP5/ RCP4 (PowerCON Applicable) /RCP3/RCP2

### **Features**

# High-resolution battery-less absolute encoder compatible

The RCP6 equipped with a high-resolution battery-less absolute encoder is supported. Since no battery is needed to retain position data, less space is required in the control panel, which in turn leads to lower cost of your equipment. The resolution is increased from 800 pulses /rev to 8,192 pulses/rev.

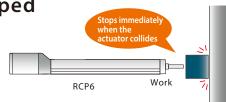

# 2 PowerCON Equipped

PowerCON (high-output driver) which can enable the stepper motor to perform at its maximum capacity is now installed. By using PowerCON, the output of the stepper motor is increased by 50%. It contributes to cycle time reduction and productivity improvement.

# **Collision Detection Function Equipped**

This function stops the operation immediately when the actuator comes into contact with an object.

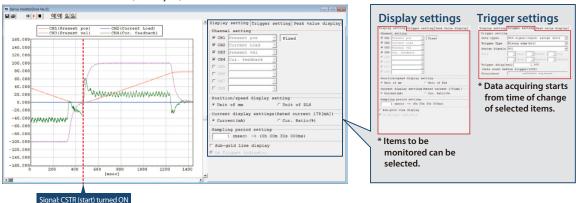

The actuator stops without crashing, so that damage to the actuator can be minimized.

# 4 Enhanced Monitor Functions

The PC compatible software can display information about the actuator and controller in operation as waveforms. \*Information that can be displayed: Command current value, current speed/position, and PIO signals (start, positioning completion, alarm, etc.) Using the trigger function, the end user can specify a particular moment, either a change in PIO signals or a designated moment during the actuator's operation time, to begin displaying the waveforms.

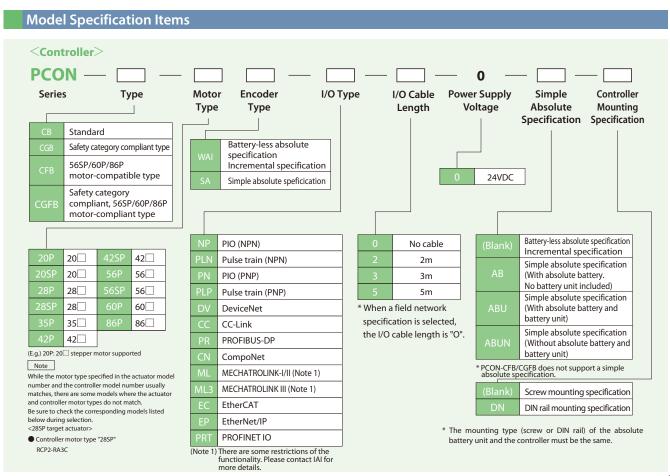

Monitor function screen (example)

<sup>\*1</sup>MECHATROLINK I/II is treated as an Intelligent I/O and supports only asynchronous commands. MECHATROLINK III is compatible with standard servo profiles.

# ■ 56SP/60P/86P Motor Compatible < PCON-CFB/CGFB>

# MCON-C/CG

**CON Series Position Controller** 8-axis type

# MCON-LC/LCG CON Series Position Controller PLC function equip

**PLC function equipped type** 

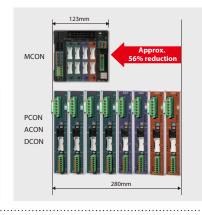

**Features** 

MCON-C/CG, MCON-LC/LCG Common

Saves space and reduces cost

It saves space in the control panel and significantly reduces the total cost by combining 8<sup>\*</sup> controllers into one.

\* For MCON-C/CG

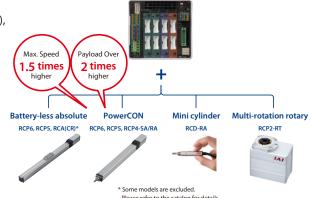

# Accommodates a wide range of actuators

It corresponds to actuators with battery-less absolute encoders, ultra-compact minicylinders, multi-rotation rotaries and more, expanding the operable actuators from small to large.

In addition, it is equipped with the PowerCON (high-output driver), and achieves maximum speeds 1.5 times higher and maximum load capacities over 2 times higher than conventional models when used in combination with the RCP6/RCP5/RCP4 actuators.

### Allows the installation of 7 types of driver boards

- (1) Battery-less absolute/incremental driver boards for stepper motor
- (2) Simple absolute driver board for stepper motor
- (3) Battery-less absolute/incremental driver boards for PowerCON
- (4) Simple absolute driver board for PowerCON
- (5) Battery-less absolute/incremental driver boards for AC servo motor
- (6) Simple absolute driver boards for AC servo motor
- (7) Incremental driver boards for brush-less DC motor

# Many useful functions

### Servo monitoring in AUTO mode function

· AUTO mode servo monitoring can now be performed using multiaxis controllers.

In addition, the monitoring can start from the moment that the condition of a selected signal changes. (Trigger function)

#### Calendar function

· With the addition of the clock function, the alarm history is displayed with the time of occurrence, making it easier for the alarm to be analyzed.

### Smart tuning function

·The optimum acceleration and deceleration are set according to the payload to be carried.

### Off-board tuning function (For AC servo motor)

· The optimum gain is set according to the payload.

### Vibration control function (For AC servo motor)

· It reduces the shaking (vibration) of the workpiece attached to the slider.

### Acceleration/deceleration mode specification

· The acceleration and deceleration patterns can be specified from the trapezoid pattern, first-order delay filter and S-shaped motion.

#### Axis name display function

· The axis name can be displayed in the PC compatible software and touch panel teaching box.

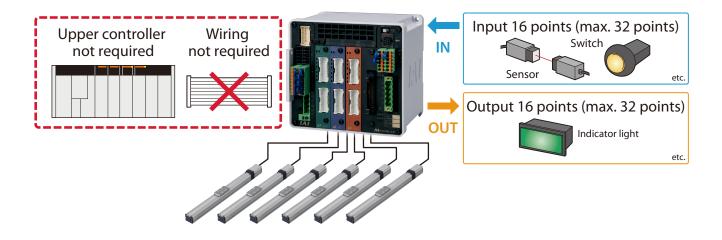

\* Some functions cannot be used, depending on the network. Please refer to the instruction manual.

# PLC function added

Capable of operating actuators by ladder programs and ON/OFF control of I/O (input and output) signals. Small-scale systems can be controlled by MCON-LC/LCG only. Load on the main PLC can be reduced by performing distributed control using MCON-LC/LCG for each procedure. In addition, it enables easier program simplification and troubleshooting.

\* Please refer to the table below for more information about ladder programs.

### Features of ladder software

As MCON-LC/LCG can be controlled by ladder programs, those who are familiar with PLC can easily use it. In addition, "Dedicated Commands" for moving the actuator are available within the ladder program, making it even easier to control.

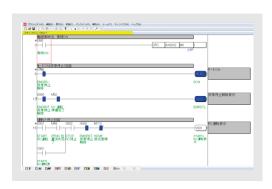

The editing software "LC-LADDER" can be used to easily write, monitor and debug ladder programs.

# **Program writing**

Programs can be written using 27 types of basic command (contact command, output commands, etc.) and 53 types of application command (data comparison, arithmetic, logical, etc.).

# **Debug function**

Run the program under the specified conditions to check the operation of the program.

# Monitoring

The state when the program is run can be checked by respective functions.

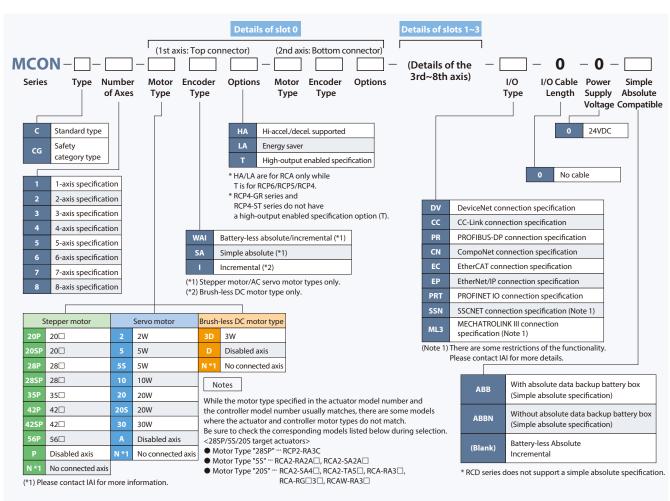

# Simulation

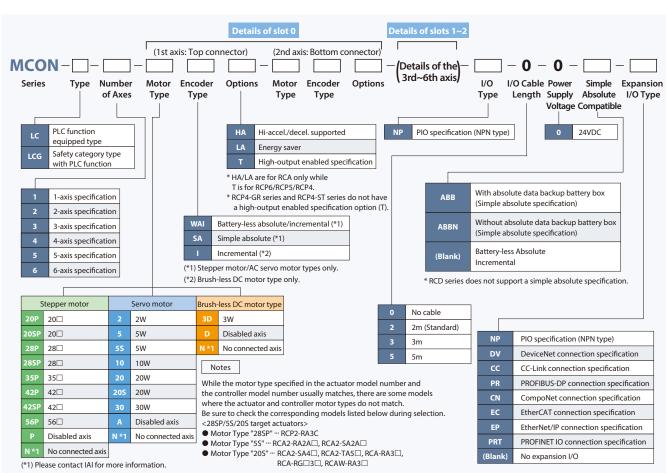

You can check the program on a PC (test run) without operating it on the controller.

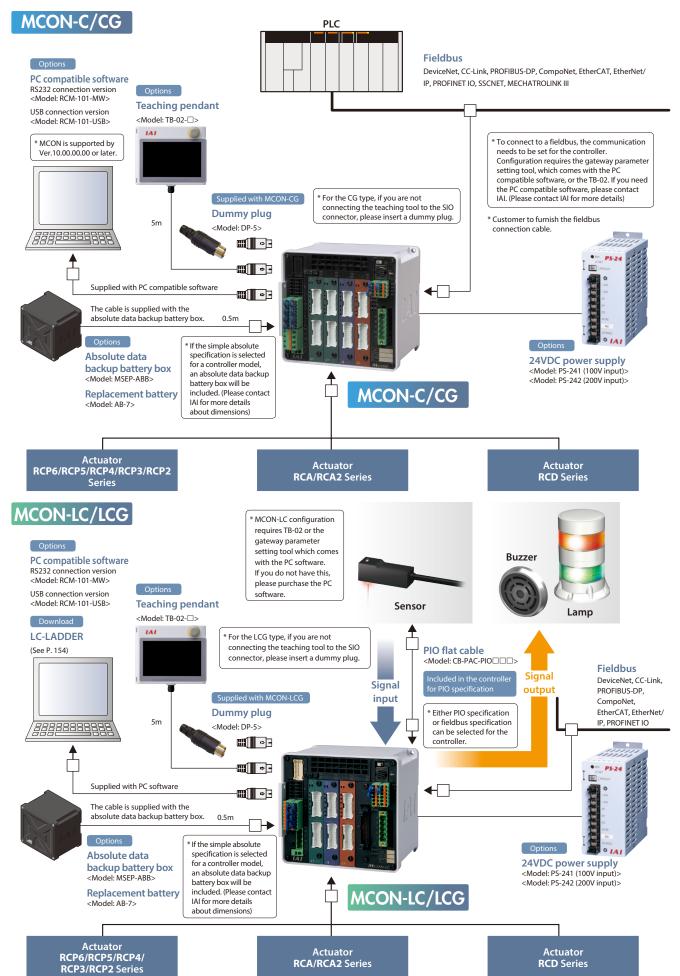

\* LC ladder can be downloaded for free here:

www.intelligentactuator.com/welcome-to-our-members-area/

Calculate the standard price of the MCON controller based on 1 base price by type and add 2 slot model price, 3 quantity of simple absolute, 4 quantity of batteries for simple absolute, 5 I/O type, and 6 expansion I/O type.

## Base price by type

Select a standard type controller (MCON-C/CG) or PLC function equipped type (MCON-LC/LCG).

# 2 Slot model price

+

Add the price of the slot models specified in the  $0\sim3$  slots.

# 3 Quantity of simple absolute encoders

Add the price of the number of axes to be operated by the simple absolute.

	1
